

How could you educate your community about the importance of a stable bee population and ways to prevent their future decline and therefore reduce the negative effects on Carroll County's ecosystem and economy?

How are bees important to pollination?
(Flower Anatomy)

Did people cause the bees to die?
(Human Impact)

Are all bees the same?
(Adaptations)

Why are bees important?

How do bees affect pollination?

What is the bee's role in the ecosystem?

Why do orchards need bees?

What would happen if all the bees died?

When did they start to die?

How fast are they dying?

What are bee's predators?

How do beekeepers help?

Do pesticides kill bees?

Why are the bees scarce?

What do they eat?

Where do they live?

Is it just honeybees that are dying?
