HIGH-LEVERAGE PRACTICES IMPLEMENTATION GUIDE EXPLICIT INSTRUCTION

Overview

Explicit instruction is a critical high-leverage practice because many researchers and practitioners understand its essential role in delivering high quality instruction across the grade levels and content areas to students with and without disabilities. Core elements of explicit instruction (see guide below) are present throughout many other HLPs, and should be present in every teacher's daily instructional repertoire.

Based on the HLP resources (*High-Leverage Practices in Special Education: The Final Report of the HLP Writing Team* and *High-Leverage Practices in the Inclusive Classroom*) and the information shared at the workshop on March 8, 2019, by Dr. Michael Kennedy the following is a checklist to guide school leaders as they address key elements that comprise effective collaboration.

Notes	 		

of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		1. Use clear and concise language, especially important when introducing new concepts
3. Use clear signals to get student attention to begin lessons 4. Use clear signals throughout lessons to signal beginning of new components 5. Review prior knowledge and skills 6. Break instruction into manageable steps appropriate for the audience 7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-lever of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when &		
4. Use clear signals throughout lessons to signal beginning of new components 5. Review prior knowledge and skills 6. Break instruction into manageable steps appropriate for the audience 7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-lever of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		Provide clear goal statement & rationale to students
5. Review prior knowledge and skills 6. Break instruction into manageable steps appropriate for the audience 7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-leve of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		3. Use clear signals to get student attention to begin lessons
6. Break instruction into manageable steps appropriate for the audience 7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-lever of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		4. Use clear signals throughout lessons to signal beginning of new components
7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-lever of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		Review prior knowledge and skills
of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc. 8. Provide immediate affirmative and corrective feedback 9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		6. Break instruction into manageable steps appropriate for the audience
9. Use a range of examples and non-examples 10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice ganizational Components of Explicit Lessons 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		7. Provide students multiple opportunities to respond throughout the lesson. Promote a high-level of success by tailoring OTRs for students' level, including oral, gestural, action-based, etc.
10. Model new skills and practices 11. Provide guided practice 12. Provide independent practice ganizational Components of Explicit Lessons 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		Provide immediate affirmative and corrective feedback
11. Provide guided practice 12. Provide independent practice ganizational Components of Explicit Lessons 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		9. Use a range of examples and non-examples
12. Provide independent practice ganizational Components of Explicit Lessons 13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		10. Model new skills and practices
13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when 8 where)		11. Provide guided practice
13. Use instructional groups 14. Use a logical sequence within lessons — easy content first, prerequisite skills in place before tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when & where)		12. Provide independent practice
tackling complex content 15. Focus instruction on critical content 16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when & where)		13. Use instructional groups
16. Use a brisk pace and limit down time 17. Address different forms of knowledge (declarative/factual, procedural/how, conditional/when & where)

KEY PRINCIPLES AND ELEMENTS OF EXPLICIT INSTRUCTION (cont.) Questions to Consider When Observing an Explicit Lesson Was the language used during the lesson free of jargon and other complex terms/concepts that students may not be familiar with? Were assumptions made about students' prior knowledge and familiarity with content being taught? Or did the teacher explicitly and systematically review key content? Did the teacher provide any modeling? Depending on pacing, was one or more of the three elements of the "I do, we do, you do" sequence used? How many, and what types of opportunities to respond were provided? Was a range of strategies used to elicit student responses? How many and what types of feedback statements were provided to students? Was feedback immediate following responses? Was down time kept to a minimum and engaged time maximized? **Notes**
