Number, Number Sense, Computation and Estimation	3M-NSCE 1	<ul style="list-style-type: none"> • Identify and write numbers 0 to 30. • Identify the place value of tens on a number line between 0 to 30. 	<ul style="list-style-type: none"> • One-to-one correspondence • Counting • Building the value of number with units and rods 	<ul style="list-style-type: none"> • Lay out number cards 0-30 and have students select a number and say the number aloud. • Roll 2 dot cubes, have the student write a 2-digit number based on what they rolled; have students make the larger number and the smaller number based on the two numbers rolled (e.g.; 42 and 24). • Give student a picture of units and rods. Have them determine the amount and match it to the appropriate number card.
	3M-NSCE 2	<ul style="list-style-type: none"> • Solve addition and subtraction problems when result is unknown with numbers 0-30. 	<ul style="list-style-type: none"> • Understand ways to make groups of 10 • Meaning of + and - symbols 	<ul style="list-style-type: none"> • Have a deck of cards numbered 0-30. Turn over two cards. Have a student roll a die that has + and - signs. The student then adds or subtracts the two numbers and writes the sum or difference. • Give student an addition or subtraction fact. Give them a problem solving mat and some counters so they can act out the problem using the counters. Have them say or write the total in numbers. <div style="border: 1px solid black; padding: 10px; width: fit-content; margin: 10px auto;"> $\bigcirc + \bigcirc = \bigcirc$ </div>

	3M-NSCE 3	<ul style="list-style-type: none"> Determine fractional part from a whole. Recognize that shapes can be portioned into equal areas. 	<ul style="list-style-type: none"> Recognize shapes that are cut into equal and/or unequal parts 	<ul style="list-style-type: none"> Give student several cards that are cut into equal parts(ex: halves, thirds, fourths, etc.). Have the student select all the cards that show halves. Give student different shapes (ex: squares, triangles, circles, etc.) Have the student divide the shape into equal parts. For example, have the student split a rectangle into 3 equal parts.
	3M -NSCE 4	<ul style="list-style-type: none"> Add to solve single-step story problems from 0-30. Identify place value to tens place. 	<ul style="list-style-type: none"> Understand ways to make 10 Understand meaning of + and - 	<ul style="list-style-type: none"> Use the <i>Make Ten</i> strategy (e.g.; $9 + 5$ is make the 9 a 10 and make the 5 a 4 and $10 + 4 = 14$ so $9 + 5$ also = 14). Use the <i>Hundreds Board</i> to model counts of 10 to 100 and have students note that for each count of 10, the number in the 10's place increases by 1-ten-<u>10</u>, <u>20</u>, <u>30</u>, <u>40</u>,...<u>100</u>.
	3M -NSCE 5	<ul style="list-style-type: none"> Use addition to find total number of objects arranged within equal groups up to a total of 10. Count by tens using money. 	<ul style="list-style-type: none"> Skip count by 2s, 5s, and 10s 	<ul style="list-style-type: none"> Give students a piece of paper that has pre-drawn circles. Ask them to put a certain amount in each circle. Have them find the total and write a number sentence to show how they found the total. For example, you may give them 3 circles and ask them to place 3 counters in each circle. They would find the total and write $3+3+3=9$. Give students a collection of dimes. Have them count by 10s to find total.
