

Technology Tips & Tricks: Learning from the Past and Thinking Toward the Future!

December 8, 2021, 12:00pm-1:00pm or 3:00pm-4:00pm

Registration available on the [TechKnowledge Conference Program 2021-2022](#).

During the pandemic, we faced many challenges; but we also learned many new skills in figuring out how to meet student needs in the virtual world. Join us for an action-packed session where we will share our favorite tech strategies we have learned this past year and how we can use them moving forward. We will explore strategies that can be used to support teachers, students, and families in their collaborative efforts. This will be a give and take style presentation where we invite participants to share their favorite tech tips and how they will use them in the future as well. So, bring your ideas and be ready to join the conversation!

Presenters:

Holly Love is a Speech Language Pathologist (SLP) and Assistive Technology Professional with the T/TAC @ Virginia Tech. She worked in Virginia and Tennessee public schools as an SLP prior to joining the staff at T/TAC in 2000. She is currently a coordinator of low-incidence disabilities and supports educational teams around the areas of communication, Autism Spectrum Disorder and assistive technology.

Lynn Everett is a project coordinator at the T/TAC @ Virginia Tech. Prior to joining the T/TAC faculty she was a special education teacher and then administrator for Montgomery County Public Schools. Currently, she supports individual teachers and division-wide efforts in the areas of Autism Spectrum Disorder and literacy.
